Dual-Strain Microbiome Support

Provides Lactobacillus acidophilus and Bifidobacterium animalis to help maintain and restore a balanced intestinal microbiome.

High-Potency 31 Billion CFUs

Delivers a clinically relevant CFU count to support digestive function and microbial diversity.

Digestive & GI Health Support

Supports normal gastrointestinal function, nutrient absorption, and overall digestive comfort.

Advanced Gut Restoration

Formulated to help replenish beneficial flora during and after disruption, including antibiotic use or dietary imbalance.
